Visit the headwaters of the San Marcos River - the San Marcos Springs. More than 200 springs bubble up from the Edwards Aquifer and discharge an average of 225 million gallons of water daily, making the site one of oldest continuously inhabited places in North America! See it by glass bottom boat!

Visit the brand new section of San Antonio's famous River Walk - the extension to the San Antonio Museum of Art and the Pearl Brewery. Experience the lock and the city's very special Art Projects along the new river walk!

Ken and Laurie Sliz are special people with unique interests and enthusiasm. Their gardens will amaze you as will their collections. Laurie will share her weaving art - and there are more surprises as they invite us into their home!
